WORK EXPERIENCE

[Viamedia](#)

Senior Software Engineer

Lexington, Kentucky (Remote)

November 2024 – Present

- Developed and deployed scalable frontend interfaces integrated with RESTful APIs and microservices, translating complex wireframes into production-ready features.
- Designed and implemented a reusable, embeddable chatbot plugin using React, Shadow DOM, and WebSockets for real-time communication, adopted by 3 applications—reducing integration overhead by 60% and improving maintainability through a shared component architecture.
- Integrated Mapbox to build advanced geospatial features, optimizing map API usage and reducing infrastructure costs by up to 85%.
- Contributed to backend services using Node.js/Express and relational databases, implementing APIs and supporting data modeling.
- Enforced code quality standards through structured peer code reviews, reducing production defects.

[AppDesk Services Pvt. Ltd.](#)

Software Development Engineer

Gurugram, Haryana

November 2021 – September 2024

- Architected and launched scalable applications using React, Remix, and Styled Components.
- Optimized application performance and scalability, reducing load times by 30%.
- Spearheaded requirement analysis, delivery of multiple UI modules, accelerating project completion by 15%.
- Mentored 3+ new hires, reducing onboarding time and accelerating feature delivery.
- Led peer code reviews and knowledge-sharing sessions to drive continuous improvement.

[Limetray](#)

Associate Software Engineer

Gurugram, Haryana

August 2020 – July 2021

- Built and delivered production-ready web applications using HTML, CSS, JavaScript, and React, ensuring cross-browser compatibility and performance optimization.
- Coordinated with team members on live projects, gaining a comprehensive understanding of live company projects.
- Implemented a new testing framework that improved code quality and reduced bugs in production by 20%.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Remix.js, Redux, Tailwind CSS, Styled Components, Material UI, Framer Motion

Backend: Node.js, Express.js, Supabase, Server Actions, REST APIs

Databases: PostgreSQL (RLS, migrations), MongoDB

Cloud & DevOps: AWS (EC2, CloudWatch, Lambda), Vercel, Cloudflare R2 / S3

Core Concepts: Data Structures & Algorithms, REST APIs, Microservices & Multi-Tenant Architecture

EDUCATION

Year	Degree/Certificate	Institutions/Board, City
2020	B. Tech. (EEE)	Bharati Vidyapeeth's College Of Engineering
2016	XII	Bharatiya Vidya Bhavan, Delhi / CBSE, Delhi
2014	X	Bharatiya Vidya Bhavan, Delhi / CBSE, Delhi

PROJECTS

[Join The Jashn](#)

- Built and launched Jashn, a self-serve digital invitation platform, from concept to first paying customers, with 20 handcrafted themes using Next.js, React, TypeScript, GSAP, Framer Motion, Lenis and Tailwind CSS.
- Designed scalable multi-tenant PostgreSQL/RLS architecture, secure guest authentication, serverless media pipeline with Cloudflare R2, and reliable Razorpay payments; Tech: Next.js 16, React 19, TypeScript, Node.js, PostgreSQL, Supabase, Cloudflare R2, Razorpay, Vercel, Tailwind CSS, GSAP, Framer Motion, Lenis.
